EDUCATION

University of Houston

Houston, TX

B.S. in Computer Science, GPA: 3.4/4.0

Aug 2024 – May 2028 (Expected)

- Relevant Coursework: Data Structures, Discrete Mathematics, Linear Algebra, Computer Architecture

Certifications

Amazon Web Services

- AWS Certified Cloud Practitioner (Jul 2025)
- AWS Certified Solutions Architect Associate (Jan 2026)

RELEVANT EXPERIENCE

Software Engineer Intern

Apr 2026 – Present

NASA Johnson Space Center – Leidos (Cargo Mission Contract)

Webster, TX

- Architected a relational SharePoint Lists schema for a full-stack action-item tracking system, eliminating manual spreadsheet tracking and manual assignment notifications by 100% across 20+ Leidos and Contract Managers.
- Built a Power Apps Canvas App with a Power Automate backend in a GCCHigh M365 environment, implementing role-based access control, automated multi-owner notifications, and audit-trail logging across 10+ tracked fields.
- Diagnosed and fixed a recurring duplicate-trigger bug in production flows by introducing a change-tracking field, eliminating redundant notifications under GCCHigh API throttling constraints.

Software Engineering Intern

Feb 2026 – May 2026

Motate – LienHunter

Remote

- Developed a web platform to aggregate and analyze county tax lien auction data for real estate investors across Arizona and in the US.
- Built Python scrapers for 3 Arizona counties using Playwright (headless Chromium) and BeautifulSoup, extracting 9,500+ lien records.
- Collaborated in agile sprints, participating in code reviews and delivering secure, scalable updates to collaborators.

Founding Technical Development Lead

Oct 2025 – Jan 2026

University of Houston – Asians in Tech (AiT)

Houston, TX

- Collaborated with technical officers and student leaders to build a beginner-friendly technical ecosystem for students interested in software and technology.
- Planned and led coding workshops and project nights covering topics such as web development and APIs.
- Encouraged peer learning and professional growth through discussions on internships, interview preparation, and technical best practices.

TECHNICAL PROJECTS

WasteFlow – Circular Exchange Prototype | Next.js, FastAPI, TypeScript, Python, Gemini 2.5

Oct 2025

- Built a full-stack prototype connecting waste producers and buyers using AI-assisted material compatibility scoring.
- Implemented FastAPI endpoints for company data and AI-driven recommendations.
- Developed an interactive Next.js interface with data visualizations to explore trade opportunities.

Smart Playlist App | React, TypeScript, Tailwind, Node/Express, Spotify Web API

Dec 2025

- Developed a Spotify companion app generating short AI audio transitions for smoother playback.
- Implemented OAuth (PKCE), playlist browsing, and per-track transition controls.
- Integrated text-to-audio generation and caching to improve demo performance.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript, HTML/CSS

Frameworks: React.js, Next.js, Node.js, Express.js, Django REST, FastAPI

Cloud & Tools: AWS (EC2, S3, IAM, Lambda), Docker, Git/GitHub, Linux, CI/CD

Concepts: Agile, Scrum, Backlog Management, Object-Oriented Design, API Design, Scalability, Data Structures & Algorithms
